

LINCO Automatic Batch Weigher 652

Dimensions LxW:	600 x 500mm
Standard Height:	520mm +200mm adjustable*
Max Tub Size:	550mm x 430mm
Power Supply:	415Vac + Neutral
Air Supply	4 Bar
Max Weight:	50Kg
Weight Accuracy:	0.1%
Weighcell Accuracy Class:	OIML R60 C3 High accuracy

The LINCO Batch Weigher is an extremely good alternative to manual filling and batching.

The automatic filling and batching is regulated by the integrated controller which gives a two speed filling rate for higher accuracy.

The Automatic Batch Weigher controls the box infeed and takeaway conveyors plus the product conveyor. This will minimise the manual labour needs and improve the production flow .

Stainless steel construction means that the scale and conveyor can be completely washed down with ease.
